

I am saying NO to the area code change in wyoming county from 716 to 585. I have used the new code but it makes contacting our physicians and family difficult. My children cannot call me easily while I am at work just 3 miles away. My mother-in-law just 10 miles away would also have difficulty contacting us. She is elderly and not in the best of health. Please reconsider this change as it has serious negative consequences for us.
